Environmental Sustainability with Notify

Looking after our planet, its finite resources, and our climate has become one of the biggest challenges of our age. Whilst Governments must play their part in setting the goals and agenda, organisations play a key role in driving environmental sustainability.

A growing number of businesses are taking responsibility for conserving natural resources, protecting our global ecosystems and "doing the right thing".

Notify clients are using additional features within our SHEQ software to take advantage of its capabilities to risk assess, monitor and report against environmental impacts. They are doing the right thing to help deliver urgent global goals.

CO2 levels need to fall 45% by 2030, reaching net zero around 2050

- Noise
- Ground Contamination
- Oil/Chemical Spills

We are also seeing rapid increases in clients tracking positive environmental goals in…

Sustainability best practices have been shown to be a competitive differentiator

Preventing Pollution

Waste Management

Biological Protection

Resource Savings

Why is environmental sustainability important?

From April 2022, Environmental, Social and Governance (ESG) reporting became mandatory for all private UK companies with over 500 employees and an annual turnover of £500+ million. ESG is not just good for the planet, it's good for business and can help:

- Reducing operating costs by up to **60%**
- Decreasing regulatory and legal interventions by up to **60%**
- Attracting clients who want to pay more for **green products**
- Appealing to and **retaining quality employees** who share the same values

How can technology help with ESG reporting?

Whether you're looking to start or accelerate your ESG journey, a connected SHEQ platform can help your organisation implement ESG reporting programmes by collecting, consolidating, and measuring your performance.

How can Notify help you minimise your ESG impact?

Notify can help you assess, report and track actions using the Plan, Do, Check, Act framework:

	Plan	Do	Check	Act
E	Carry out Environmental Risk Assessments	Report on: • Water pollution and leaks • Air pollution • Land degradation • Evidence of hazardous materials	• Track product and materials sourcing ensuring your supply chain is reputable • Track water consumption and quality to manage efficiency programmes • Audit supply chain ensuring they meet your policies	• Create plans that ensure your team complies with your policies and procedures for sustainability and environmental good governance
S	Create your risk assessments for Occupational Health & Safety	Report on: • Near misses • Accidents & incidents • Hazards • Wellbeing • Mental Health • Welfare	• Audit work to confirm that safety policies are understood and within compliance • Check in with workforce to get their views on physical and mental wellbeing • Track diversity and inclusion measures to ensure the workplace is balanced	• Create corrective actions to ensure that lessons are learned
G	Risk assess your supply chain against your policies and procedures	• Empower employees and contractors to carry out whistleblowing	Audits to confirm compliance with policies on: • Bribery and corruption • Grievance • GDPR • Cyber security • Whistleblowing • Anti-competitive behaviours	• Log and report on areas of non-compliance
