

How digitalisation revolutionised the safety culture within Chester Race Company

About

Partner since: April 2022

Employees: 200

Industry: Entertainment & Leisure

Company HQ: Chester, UK

Challenge

Chester Race Company faced difficulties in collating and extracting insights from paper-based reporting forms and near miss slips, hindering their efforts to enhance the working environment and share statistics. This led to challenges in conducting trend analysis, communicating improvements effectively, and making well-informed business decisions.

Solution

Chester Race Company chose Notify for its professional and modern appearance, as well as its user-friendly apps that seamlessly integrate with the system. The ability for contractors and seasonal team members to access the apps without a user account was a crucial factor in their decision. Notify has significantly transformed the safety culture across the company, enabling all of their sites to effectively report incidents, near-misses, and positive safety observations. Notify's dashboard modules have also facilitated the delivery of engaging health and safety reports, aiding senior managers and health and safety representatives in their decision making.

Results

A revolutionised safety culture

Timely end of season reports

Chester Race Company use Notify for [Incident Management](#), [Audit and Inspections](#), [Risk Assessments](#), [Safety Intelligence](#) and [Actions](#)

Notify's ease of reporting, quick reporting time and modern and sleek look has helped us on our health, safety, and wellbeing revolution! It's a dynamic piece of software that has helped us get all of our people on board and deliver informed safety improvements across all our divisions. Notify really is helping us to look after our people, guests and contractors."

Matthew Jones, Head of Health and Safety
