Company HQ: Horsham, UK

Challenge

Arun Estates has a network of offices and a diverse property stock across the South East requiring regular inspection. Prior to using Notify, Arun Estates relied on traditional Microsoft programmes such as Word and Excel for safety management and data capture. Audits and Inspections relied heavily on printed documentation and Risk Assessments were created and managed using Excel. These methods were time consuming and made follow up actions and monitoring difficult to manage, and data prone to inconsistency.

Solution

Rather than a generic, out-of-the-box product, Arun Estates needed a tailored health and safety system that met their specific requirements. Notify provided exactly that.

Notify's digital audits and risk assessments saved time and enabled Arun Estates to capture accurate and timely safety information. Its GDPR-compliant incident reporting system and mobile app eliminated manual updates to accident books and allowed free reporting of positive observations and other safety events, helping to drive a proactive safety culture.

Results

Improved safety culture

A tailored, cost-effective system

Arun Estates use Notify for [Safety Intelligence](#), [Risk Assessments](#), [Audits and Inspections](#), [Actions](#) and [Incident Management](#)

“

We are thrilled with the service provided by Notify Technology. They truly embrace agile principles, working closely with us at every step to ensure the solution perfectly aligned with our needs. We couldn't be more satisfied with the results.”

Rentia Marx,
Health and Safety Advisor
